

**NORTH YORKSHIRE COUNTY COUNCIL**  
**CORPORATE AND PARTNERSHIPS OVERVIEW AND SCRUTINY**  
**COMMITTEE**

**2 December 2019**

**Alternative Investments – Year 2 Review**

**1. INTRODUCTION AND BACKGROUND**

- 1.1 In August 2017 the Executive approved an alternative investment framework with £50m earmarked for longer term, more commercial investment. This was in response to the financial environment and low Bank Base Rate (BRR) which meant that the Council was (and still is) getting incredibly low returns on traditional investment of the Council's cash balances. In January 2019, following a review of the first year's activity, the overall sum available for investment was increased to £60m.
- 1.2 The approved strategic approach to managing cash resources was in accordance with the Council's Treasury Management Strategy and aimed to improve treasury returns, achieve revenue savings and potentially support the Council's wider objectives – for example driving additional income to support the Council's savings plans which in turn helps to ease pressure on front-line services.
- 1.3 The aim through this approach is to identify, assess and implement longer term (5 years plus) investment decisions including an element that targets commercial returns whilst ensuring the Council has access to sufficient cash to manage its day to day operations.
- 1.4 This report reviews the progress made over the last year, identifies lessons learned and the intended direction for the year ahead. Monitoring of the investments is incorporated into both the quarterly Capital Plan and Treasury Management reports to Executive.

**2. OPTIONS CONSIDERED**

- 2.1 The opportunities for investment fall into 3 broad categories:
- Internal Financing Adjustments – these opportunities are concerned with the use of resources within the Council, allowing resources to be earmarked or set aside to achieve revenue savings. They may not include the actual transfer of cash and as such can provide flexible opportunities.
  - Alternative Treasury Management Instruments – these opportunities involve extension of the institutions and/or cash investment vehicles available to the Council through its traditional treasury management function.
  - Alternative commercial investments – these opportunities are associated with the potential to invest in physical assets and projects delivered either directly by the Council or by/with partners in order to achieve a payback of the investment and an added return.

**3. THE FRAMEWORK**

- 3.1 The options available to the Council are varied and individual investments are subject to business case. However, limits on the sums invested and targets for investment returns ensure an appropriate balance between risk and reward, a diverse portfolio to help manage risk, and churn of cash to take advantage of future opportunities down the line.

- 3.2 The current approved high level decision framework comprises the following limits and target returns:

Type of investment	Risk	Maximum Exposure £000	Maximum Term Years	Target Rate (above BBR) %
<b>Alternative treasury instruments - <i>note already covered in Treasury Strategy</i></b>	<b>Low</b>	<b>20,000 per category</b>	<b>1 - 5</b>	<b>&gt; 0.1</b>
<b>Alternative Investments (overall Max):</b>		<b>60,000</b>		
Spend to Save	Low	5,000	7	4.0
Loans to Council Companies	Low - Medium	25,000	10	443.0
Loans to Housing Associations	Medium	10,000	20	3.0
Solar Farm (or similar)	Medium	5,000	20	7.0
Commercial Property	High	20,000	10	5.0

- 3.3 Consideration of individual investment opportunities are subject to detailed business cases with their risks and rewards assessed.
- 3.4 Given the technical nature of such investments and strong linkages to the Council's Treasury Management function, appropriate governance and decision making arrangements are needed to ensure robust due diligence and the necessary agility to act. The Commercial Investment Board considers the identified opportunities and oversees the arrangements.
- 3.5 The Executive delegated authority to enter into individual investments up to £2.5m within an overall total of £10m p.a. The Board's approved terms of reference are attached at **Appendix A**.
- 3.6 The Board meet routinely every 2 months but more frequently when opportunities are actively being considered. This flexible approach enables a degree of agility for lower value opportunities, with investments in excess of £2.5m requiring Executive approval and therefore a longer lead in time.

#### 4. YEAR 2 – A REVIEW OF ACHIEVEMENTS

- 4.1 The investment framework approved by the Executive identifies a range of potential investment options. Each of the investments identified under the framework has been explored, with significant progress made in the following areas over the last year:

##### **Alternative Treasury Management Instruments**

- 4.2 A number of alternative instruments are potentially available to the Council – some already covered by the approved Treasury Management Strategy but not yet used. Typically, higher credited rated instruments offer lower rates of return and therefore some of these types of investment have limited impact on overall returns. However, they do provide alternatives to the investment we currently use and as such allow us to diversify our portfolio. Options currently used are:

- i) Money Market Funds
- ii) Certificates of Deposit (CDs)
- iii) Property Funds

4.3 A review of the Council's Treasury Management Strategy was undertaken in 2017/18 and a £20m limit was included for these opportunities. The infrastructure for the alternative investment options identified is now in place.

#### Money Market Funds

4.4 Following a selection process supported by the Councils Treasury Management advisers the following Money Market Funds were selected for investment:

- BlackRock Money Market Fund
- State Street Global GBP Liquidity Fund

4.5 Accounts have been opened with both funds and investment opportunities are continually monitored against other Treasury Management investment options. Money Market Fund investments are highly liquid with daily access to funds available – an average balance of £10.7m at 0.72% has been invested in funds up to 30 September 2019.

#### Certificates of Deposit (CDs)

4.6 The Council has now established a custodian account to enable investment in a wider range of treasury instruments, including Certificates of Deposit (CDs). In 2018/19 the Council invested in Nat West Bank (£5m) and Credit et Industriel Bank (£5m). Both of these investments matured in early 2019. While further potential investments continue to be monitored, rates available with approved institutions have not been competitive.

#### Property Funds

4.7 A detailed selection process was undertaken in 2018/19, supported by the County Councils Treasury Management advisers and, two Property Funds were selected for investment:

- BlackRock UK Property Fund
- Threadneedle Property Unit Trust

Accounts were opened with both funds and a £3m investment in each fund was agreed with transactions completed at the end of October 2018.

4.8 Over the last year the funds have provided a good revenue returns but have experienced capital losses - £67k in 2019/20 and £41k in 2018/19. Given the on-going wider economic and political uncertainty capital losses and impacts on revenue returns are expected and these funds are monitored closely.

4.9 Property funds are long term investments and valuations can, therefore, rise and fall, over the period they are held. Any gains or losses in the capital value of investments are held in an unusable reserve on the balance sheet and do not impact on the General Fund until units in the funds are sold.

### **Alternative Commercial Investments**

#### Loans to Council Companies

4.10 The Council currently owns (in whole or part) a number of companies which have been established to deliver a variety of objectives. The Council provides cash flow support to these companies and has £20.9m loans (at 30 September 2019) on its balance sheet at a variety of terms (duration and interest rates).

- 4.11 Given the nature of the companies and the Council's direct involvement in their operation, relative to other types of investment these are considered lower risk and are currently offered at a rate of bank base rate plus 4% but this is under review.
- 4.15 Loans are classed as capital expenditure and financed through internal borrowing in accordance with the Council's Treasury Management Strategy. Current Loans to Limited Companies at 30 September 2019 are:

Company Loan	Total Loan Approved £k	Interest Rate %	First Drawdown Date	Total Loan 30/09/2019 £k	F'cast Int 2019/20 £k
NYNet*	10,000	Base + 3.0	01/04/2006	9,872	268
Yorwaste I	3,700	Base + 4.0	23/05/2012	3,700	176
Yorwaste II	3,850	Base + 4.0	19/06/2017	2,721	139
Brierley Homes	25,000	Base + 4.0	12/05/2017	4,557	349
Align Property Partners	500	Base + 4.0	N/A	0	0
First North Law	250	Base + 4.0	09/05/2017	85	12
	<b>43,300</b>			<b>20,935</b>	<b>944</b>

\* The NYNet Loan is an overdraft facility.

- 4.16 As shown in the table above, there is an increasing demand for loans from the Councils limited companies and lending limits will be kept under review.

#### Commercial Property

- 4.17 Direct investment in commercial property can be aligned to the Council's Economic Development Strategy and/or can be undertaken on a purely commercial basis. Returns can vary significantly and each opportunity has to be considered on its merits having due regard to risk and reward. To date the Council has shortlisted 51 potential property investments; taken 17 to business case stage; six bids have been formally submitted; and three of these properties have been successfully acquired. Details of property investments to date are as follows:

#### **Bank Unit in Stafford Town Centre**

- 4.18 The acquisition of a freehold bank unit and lease in Stafford Town Centre, Staffordshire. The property is currently let to Bank of Scotland plc trading as Halifax and is held on a lease that runs to November 2031. The property was purchased for £850k with purchase of costs of £33k. The current rent is £53k p.a. providing a Net Initial Yield of 6.0%.

#### **Harrogate Royal Baths**

- 4.19 The acquisition of a leasehold restaurant / leisure investment in Harrogate Town Centre. The lease was purchased for £9,050k with purchase of costs of £546k. The property comprises of four commercial units - three units are currently let with expiry periods ranging from 2027 – 2038. One unit was vacated in early 2019 after the tenant entered administration and is now being marketed. There has been a good deal of interest in the unit and there is a high degree of optimism that a quality long term tenant will be found due to the nature of the property. This does, however, illustrate that commercial investment returns are in exchange for risk so this is likely to be a recurring feature in the future. A further unit has also undergone a refurbishment to retain tenant viability, resulting in

renegotiation of timing rent payments. Due to the vacant unit the current rent is £376k p.a. (previously £501k p.a.).

### **Co-op Store**

- 4.20 The acquisition of a freehold retail unit and lease in North Somercotes, Lincolnshire. The property is currently let to Co-Operative Group Food Limited on a 15-year lease that runs to 20 September 2033. The property was purchased for £1,428k with purchase costs of £69k. The current rent is £80k p.a. providing a Net Initial Yield of 5.3%.

## **5. ESTIMATED RETURNS**

- 5.1 **Appendix B** sets out a summary of the estimated returns from the investments made to date. In total MRP savings of £600k have been achieved, returns on treasury investments are estimated to be £377k and returns on the alternative investments in place are estimated at £1,578k p.a. The total projected annual gross income/savings generated from the alternative investments to date is £2,555k – this is a margin of £1,846k over traditional treasury management returns.
- 5.2 The report which set out the proposed framework indicated that annual revenue savings/returns of in excess of £1.7m could be reasonably achieved (subject to projects being identified and approval of business cases).
- 5.3 A 2% top-slice of the additional returns contribute to the Finance savings programme - which based on returns of £1,846k estimated to date, would result in a top-slice of £37k. This will be kept under review as further investments are made.

## **6. LESSONS LEARNED**

- 6.1 Whilst significant returns are expected from these investments the resource input required from within and external to the Council is also significant. Each proposition requires careful assessment of the market, the legal issues, and the risks and the returns expected in order to inform a robust business case.
- 6.2 The competitive nature of the market for these investments means that a degree of failure to secure investments is to be expected and indeed some business case work will be abortive as some investments will not be considered appropriate for investment. Where possible early sifting of proposals aims to focus efforts on opportunities worth pursuing but inevitably not all business cases will result in a successful acquisition.
- 6.3 Appropriate due diligence is crucial in order to take decisions for investment and it is important that timely expert advice is sought when necessary, in order to adequately assess the potential risks and rewards from such opportunities.
- 6.4 Commercial asset ownership brings landlord responsibilities and whilst where possible and appropriate, managing agents will be used, there is an overhead which cannot be outsourced and the capacity in this areas needs careful monitoring to ensure sufficient oversight is maintained.

## **7. NEXT STEPS**

- 7.1 Over the coming 12 months opportunities will continue to be sought but our efforts will be focused on the following:

### Commercial Investment

- 7.2 Further opportunities for commercial investment will be sought over the coming year building on the experience gained to date. The aim will be to maximise the investments within the approved framework. There is currently £8,123k available for investment.

Solar Farm (or similar)

- 7.3 Following the previous feasibility work undertaken, work is currently underway to understand the potential for the County Council to invest in solar farms. This is a rapidly expanding industry and the country's first two subsidy free solar farms are now in operation. The development of battery storage technology appears to be a key factor in achieving subsidy free electricity generation.
- 7.4 A soft market testing exercise is currently in progress to test the market's appetite for delivering a turnkey project and to provide the intelligence we need to develop a business case for investment. Subject to a favourable business case and member approval, work will then progress to procurement during 2020/21 and then delivery.

Loans

- 7.5 There has been limited interest from Registered Social Landlords (RSLs) for housing loans, as the amount of funding NYCC is able to offer is not of sufficient scale to make a significant impact.
- 7.6 The Council's commercial agenda however, provides opportunities for extending the level and number of loans to NYCC's growing portfolio of companies. We will continue to support this agenda and keep lending limits under review.

Debt Repayment

- 7.7 The Council currently has external borrowing of £288m as at 30 September 2019 with varying terms and interest rates. Repayment of borrowing would reduce the Council's Capital Financing Requirement and hence it's MRP charge and would save external interest payments however there may be penalties for loans repaid early.
- 7.8 Link, the Council's treasury management advisors regularly review the Council's debt portfolio and current interest rates and future forecasts suggest that it is not beneficial to repay debt at this time as there would be little opportunity for early repayment without the Council incurring substantial premium charges. This will continue to be monitored as part of the Council's on-going treasury management activity.

**8. CONCLUSIONS**

- 8.1 Good progress has been made on alternative investments and together this new approach has secured estimated annual revenue savings/income of £2,555k a margin of £1,846k over traditional treasury management returns.
- 8.4 Further work to pursue the options within the approved framework will be undertaken over the next 12 months with a focus on exploration of investment in solar energy.

**9. RECOMMENDATIONS**

- 9.1 It is recommended that Overview and Scrutiny Committee:
- i) Review the progress to date and provide comments on the future actions proposed.

Karen Iveson  
Assistant Director, Strategic Resources  
21 November 2019

## **Commercial Investment Board**

### **Purpose**

**The Board will not be a constituted body and will therefore not have formal decision making powers. However, it will be the chief means of identifying, reviewing and recommending schemes for investment decisions. Such formal decisions will be taken within the existing delegations namely through delegated authority to the Corporate Director, Strategic Resources and further decisions as made by the Executive.**

To consider and recommend detailed business cases for alternative investments within the framework approved by Executive.

To approve individual investments to a limit of £2.5m per investment and up to a total of £10m in any one financial year.

To consider appropriate due diligence, proportionate to the investment/risk/reward proposed.

Notwithstanding the Corporate Director, Strategic Resources authority to terminate investments should concerns be raised - to consider and recommend cases for early termination of alternative investments.

To monitor returns against approved performance targets.

To report performance of alternative investments to the Executive on a quarterly basis

To make recommendations to Executive on any proposed changes to the framework.

### **Membership**

Lead Member for Finance (Chair)

Lead Member for Growth

Corporate Director Strategic Resources

Corporate Director Business and Environmental Services

Assistant Director Strategic Resources – LBP to CFO

Assistant Director BES - Growth, Planning and Trading Standards

### **Frequency of meetings**

Board meetings likely to be held quarterly however the nature of investment opportunities will require agility and meetings will be arranged as required outside of the quarterly schedule.
