

NORTH YORKSHIRE HEALTH AND WELLBEING BOARD – 22 January 2020

Report of the Assistant Director Health Integration

North Yorkshire Health and Wellbeing Board – Joint Health and Wellbeing Strategy

1. Purpose of Report

- 1.1 To update the Board regarding the development of the Joint Health and Wellbeing Strategy for 2020-2025.

2. Background

- 2.1 The North Yorkshire Health and Wellbeing Board is a statutory body which brings together leaders across the NHS, local government and wider partners to focus on key health and wellbeing issues.
- 2.2 The Board has three statutory duties:
 1. To develop a Joint Strategic Needs Assessment and Pharmaceutical Needs Assessment.
 2. To develop a Joint Health and Wellbeing Strategy
 3. To promote greater integration and partnership between the NHS, Local Government and Public Health.
- 2.3 The current Joint Health and Wellbeing Strategy was developed in 2015 setting out priorities for five year until 2020. The strategy focused on five priorities:
 1. Start Well
 2. Live Well
 3. Age Well
 4. Connected Communities
 5. Dying Well
- 2.4 Over the past five years, the Board has considered many issues in relation to delivering the strategy and partners have worked well together to make good progress in all five areas. Given the strategy was focused on 2015-2020, it is now time for a review of the strategy and for the Health and Wellbeing Board to set out priorities for the next five years.

3. Proposal for Developing the Joint Health and Wellbeing Strategy for 2020-25

- 3.1 Since 2015 the context that partners are working in has changed. Public Health has been embedded in Local Government for seven years; there has been a strong focus on use of resources and efficiency in Local Government and the NHS and the development of Integrated Care Systems (ICS) is happening at pace. More recently there has been the publication of 'The NHS Long Term Plan' setting out healthcare priorities for the next ten years.
- 3.2 In the light of the above, leaders across the NHS and Local Government have come together across York and North Yorkshire to form a 'System Leadership Executive (SLE)'. This SLE has begun to identify areas for joint work and shared priorities across the health and care system. The SLE are shaping priorities for York and North Yorkshire in the wider context of the developing West Yorkshire and Harrogate ICS and Humber, Coast and Vale ICS work programmes.
- 3.3 The SLE has started work on a key priority for joint action by partners to 'create a radical shift towards self-care, prevention and primary and community support, based around GP practice populations of 30-50k, in places where people live'. Work has begun to scope out what is happening in each geographical area in relation to this priority. This priority is consistent with the development sessions the Health and Wellbeing Board held last year looking at models of community, primary and social care integrated and learning from other areas; digital and housing. Another priority the SLE has identified is to 'create a modern mental health service' again consistent with the work the Board has been doing in relation to mental health.
- 3.4 The SLE will further define and finalising their priorities over the next few months. Through this work, it is likely that there will be an even greater degree of synergy and consistency in what the SLE is aiming to achieve and the Health and Wellbeing Board. It is therefore proposed that further work is done before April, to draft an aligned set of priorities for the SLE and the Board and this will provide the basis for the draft North Yorkshire Health and Wellbeing Strategy 2020-2025.

4. Recommendation

- 4.1 That the Health and Wellbeing Board note the work of the SLE and the opportunity to develop an aligned set of priorities with the Health and Wellbeing Board that will provide the basis of the draft North Yorkshire Health and Wellbeing Strategy 2020-2025.

Louise Wallace
